EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Albert S. Penilla, Esq. on May 3, 2006.

The application has been amended as follows:

In claim 1, in line 4 after "with at least one" inserted --inner--.

In claim 1, in line 5 before "the two motors" inserted --one of--.

In claim 1, in line 6 after "at least one bearing" inserted --disposed on the shaft--.

In claim 1, in line 8 after "with at least one" inserted --outer--.

In claim 1, in line 9 after "fastener fit into the" inserted --outer--.

In claim 1, in line 10 after "received in the" inserted --inner--.

In claim 1, in line 10 after "the two bearing" deleted "sleeve" and replaced with --sleeves--.

In claim 1, in line 11 after "fastener fit into the" inserted --outer--.

In claim 1, in line 12 after "received in the" inserted --inner--.

In claim 7, in line 3 after "surface between the" inserted --outer--.

In claim 9, in line 4 after "at least one groove on" deleted "its inner surface" and replaced with --the inner surface of the bearing sleeve--.

In claim 9, in line 5 after "respectively disposed in" inserted --one of--.

Art Unit: 3679

In claim 9, in line 6 after "at least one bearing" inserted --disposed on the shaft--.

In claim 9, in line 8 after "at least one" inserted --outer--.

In claim 9, in line 10 before "the connector and an outer edge" deleted "the groove formed on" and replaced with one of the outer grooves formed at the first and second end of--.

In claim 9, in line 11 before "the bearing sleeves" inserted --one of--.

In claim 12, in line 3 after "surface between the" inserted --outer--.

In claim 14, in line 7 after "at least one first bearing" inserted --disposed on the shaft--.

In claim 14, in line 10 after "at least one second bearing" inserted --disposed on the shaft--.

2. The following is an examiner's statement of reasons for allowance:

As to claims 1 and 9, Lin et al. (US 6,612,817) discloses the claimed motor assembly with the exception of comprising two bearing sleeves each formed with at least one inner groove and respectively disposed in one of the two motors; a connector having a first end and an opposed second end, the first end and the second end each formed with at least one outer groove; a first elastic fastener fit into the outer groove of the connector at the first end and received in the inner groove formed on one of the two bearing sleeves; and a second elastic fastener fit into the outer groove of the connector at the second end and received in the inner groove formed on the other bearing sleeve.

As to claim 14, Lin et al. discloses the claimed motor assembly with the exception of comprising a first bearing sleeve having one end formed with a connection part, the connection part being formed with at least one groove in its outer surface, and the first bearing sleeve is disposed in one of the two motors; a second bearing sleeve formed with at least one groove on its inner surface and disposed in the other of the two motors; and at least one ring-shaped elastic fastener having an inner edge fit into the groove formed on the connection part of the first bearing sleeve and an outer edge received in the groove formed on the second bearing sleeve.

There is no teaching or suggestion, absent the applicants' own disclosure, for one having ordinary skill in the art at the time the invention was made to modify the motor assembly as disclosed by Lin et al. to have the above mentioned elemental features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to the applicant's disclosure. The following patents show the state of the art with respect to motor assemblies:

Lin (US 6,343,014) and Takura et al. (US 6,790,017) are cited for pertaining to assemblies comprising two motors each including a shaft.
